18W Solar Power Station Set TX-200

-  Foldable solar panel with 18W
-  USB charging port
-  LED bulbs with On/Off switch
-  USB charging adapter inclusive
-  Built-in rechargeable SLA battery

Multi-functional

Charge the power station via the solar panel

Charge your mobile devices via the power station

Use with the light bulbs (included)

Multifunctional

18W solar panel makes the device independent of power sources charged by the power of sunlight. The lamp system with 4 LED lamps can light up your tent or illuminate camping area.

Practical and Easy-to-Use

This power station is used to charge small essential devices such as smartphones or radios. The solar panel easily absorbs the sun energy and ensures efficient charging. Each light bulb can be turned on and off separately.

Foldable and Durable

The solar panel kit has flexible design – you can easily bend it. Due to this, the solar energy kit is an ideal companion for short trips. The device is made of high-quality metal, so it is built to last.

LED Indicator Light

The indicator LED of the device shows the charging status. So, you can easily understand if the device needs charging or not and use it wisely. Be sure, with our device your vacation will go smoothly and carefree!
