Internet Radio

The TX-153 internet radio lets you transfer and listen to your favourite music from the digital Internet. You can receive up to 30.000 radio stations from around the world with the TX-153. Easy to connect with WiFi and thanks to the portable handy format, the TX-153 has a range of up to 80 m.

Versatile

With the AUX line out and USB slot, you can also play your stored music with super sound quality.

TFT Display

The illuminated colour display with 2.4 inch shows you all current information, such as the current radio station, time, weather monitoring and much more.

Speakers

The built-in 2 x 2W stereo speakers provide clear and quite loud sound for such a small and handy device. The memory function of 250 favourite stations is also a very useful function.
