### **Elastic Material**

Quality medical grade high elastic polymer material is used, similar to silicone gel, has excellent air permeability. Memory foam, fits under pressure and heat like a second skin

### **Relieves Pain**

Quality medical grade high elastic polymer material is used, similar to silicone gel, has excellent air permeability. Memory foam, fits under pressure and heat like a second skin

### **Resilient**

Medical grade gel material will maintain its original shape and it won't lose its support, even after long term use. When used for long sitting periods, it will continue to provide the same support throughout. A non-slip friction bead grip bottom surface ensures that it stays in place
