Charge the
power station via
the solar panel

Charge your
mobile devices
via the power
station

Use with the
light bulbs
(included)

Use as a
flashlight

Sustainable and Efficient Power Source

This portable solar panel produces continuous energy. Just place the 3W solar panel in direct sunlight and point towards the sun. Charging time is 6-9 hours and working time is up to 22 hours.

Multifunctional

3W solar panel makes the device independent of power sources charged by the power of sunlight. The lamp system with 3 LED lamps as well as bright LED panel with 4 grade brightness can light up your tent or illuminate camping area.

Portable and Practical

This power station is used to charge small essential devices such as smartphones or radios. The kit is really compact (weighs 1.6 kg and has dimensions (L) 172 x (W) 126 x (H) 76mm) – it is a great companion for short trips.

Ideal Backup Power Source

The kit is a perfect backup power and light source in emergency situations, while camping, hiking or travelling. So, don't worry - with our device you will definitely have the light outdoors and in the dark.
