

Balcony Hook PV Bracket for 600-800W TX-249

- The rustproof aluminium hooks are used for framed solar panels
- Easy and effortless to attach to the balcony railing
- The hooks are screwed to the existing holes of the modules
- The modules can then be hung on the balcony and secured with another screw to prevent them from unhooking again
- The supplied stainless steel cable ties secure the modules to the balcony so that, for example, the modules do not start to flutter in windy conditions
