

10A Battery Charger with Compressor TX-193

6-12V

Powerful 6- 12 volt battery charger for car and motorbike batteries

Maximum safety with overload, reverse polarity and short circuit protection

up to 10A

Up to 10 A charging current suitable for large batteries

Oil and maintenance-free compressor

Digital pressure regulator with automatic cut-off

- Charging current max. 10A
- Charge AGM, wet and gel batteries
- Automatic recognition of 12V and 6V batteries
- Charging current from 1A to 10A
- Short circuit, reverse polarity, overheating and overcharging protection
- Compressor with up to 8 bar
- Automatic cut-off when the set pressure is reached
- Various adapters included, (bicycle, ball needle etc.)

Technical Specifications

- LC display with indicators for charging current/ battery type, voltage and pressure
- Input voltage 230V 50Hz
- Charging current: 1,3,5 and 10A
- Charges AGM, wet and gel batteries
- Mains cable approx. 180cm
- Charging cable approx. 180cm
- Air hose approx. 300cm (stretched)
- USB-A output with max. 5V, 2.4A
- USB-C output with 5-12V up to 18W power
- LED light

Package Contents:

10A battery charger with compressor TX-193 , user manual, adapter set, compressed air hose 90° valve adapter

Item No. 4999
