Car Air purifier for 12/ 24V cigarette lighter 2x USB TX-130

Display shows loading
voltage and current

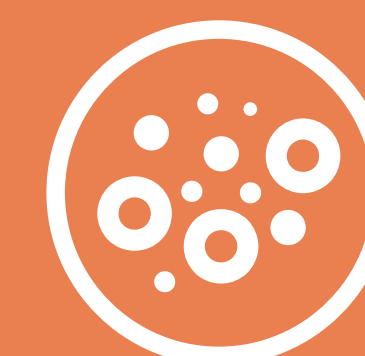

1x QC3.0 up to 9V,
max. 2A

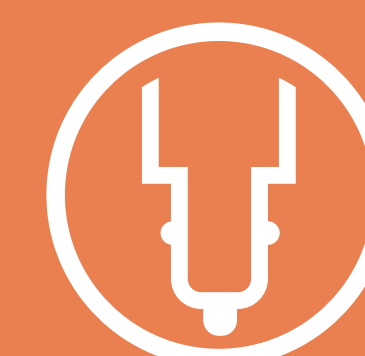

1x USB connector 5V / 2,1A

Always fit and focused
by clean air in the car

Removes unpleasant
odors from car's interior

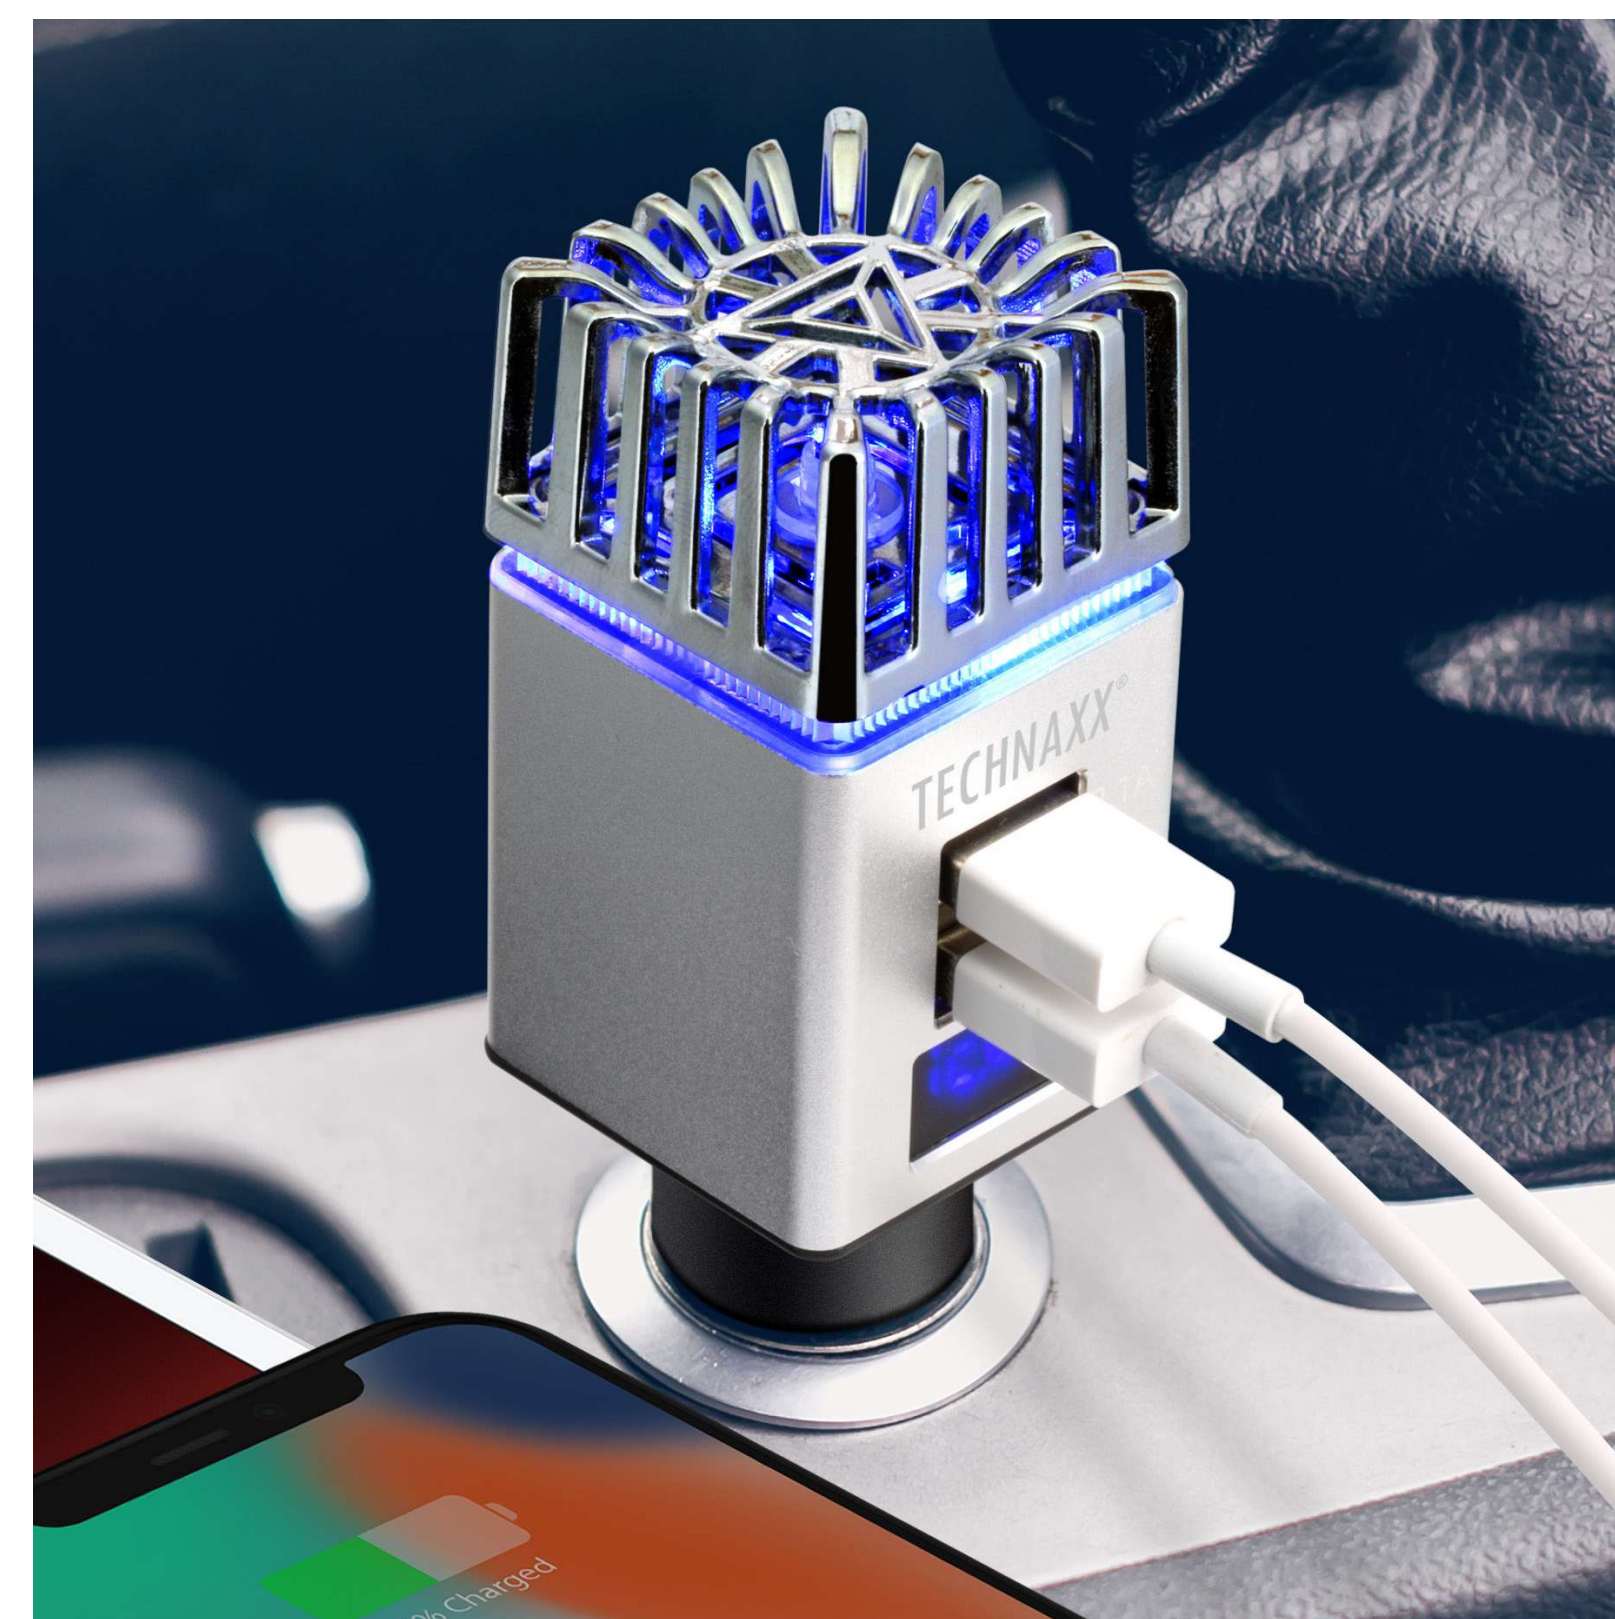

Fits to 12V / 24V
cigarette lighter

Effective

The TX-130 ioniser releases a large amount of negative ions that can effectively reduce dust, pollen, smoke, bacteria and viruses from the air (the air oxygen is charged by the ioniser, thus producing negative ions).

Easy to use

Designed specifically for in-car use, this user-friendly car air purifier plugs directly into your car's cigarette lighter adapter. After inserting the LED indicator lights up and starts producing ions. Through the 2 USB ports, the car air purifier can also be used to charge other devices at the same time.

Protection

Pollution and allergens and chemicals coming from the car itself can cause health problems. This ionizer generates 5.6 million negative ions per cc and can help reduce the allergens and chemicals in the air, such as pollen, mold spores, bacteria, viruses, dust, smoke, formaldehyde, benzene and so on.

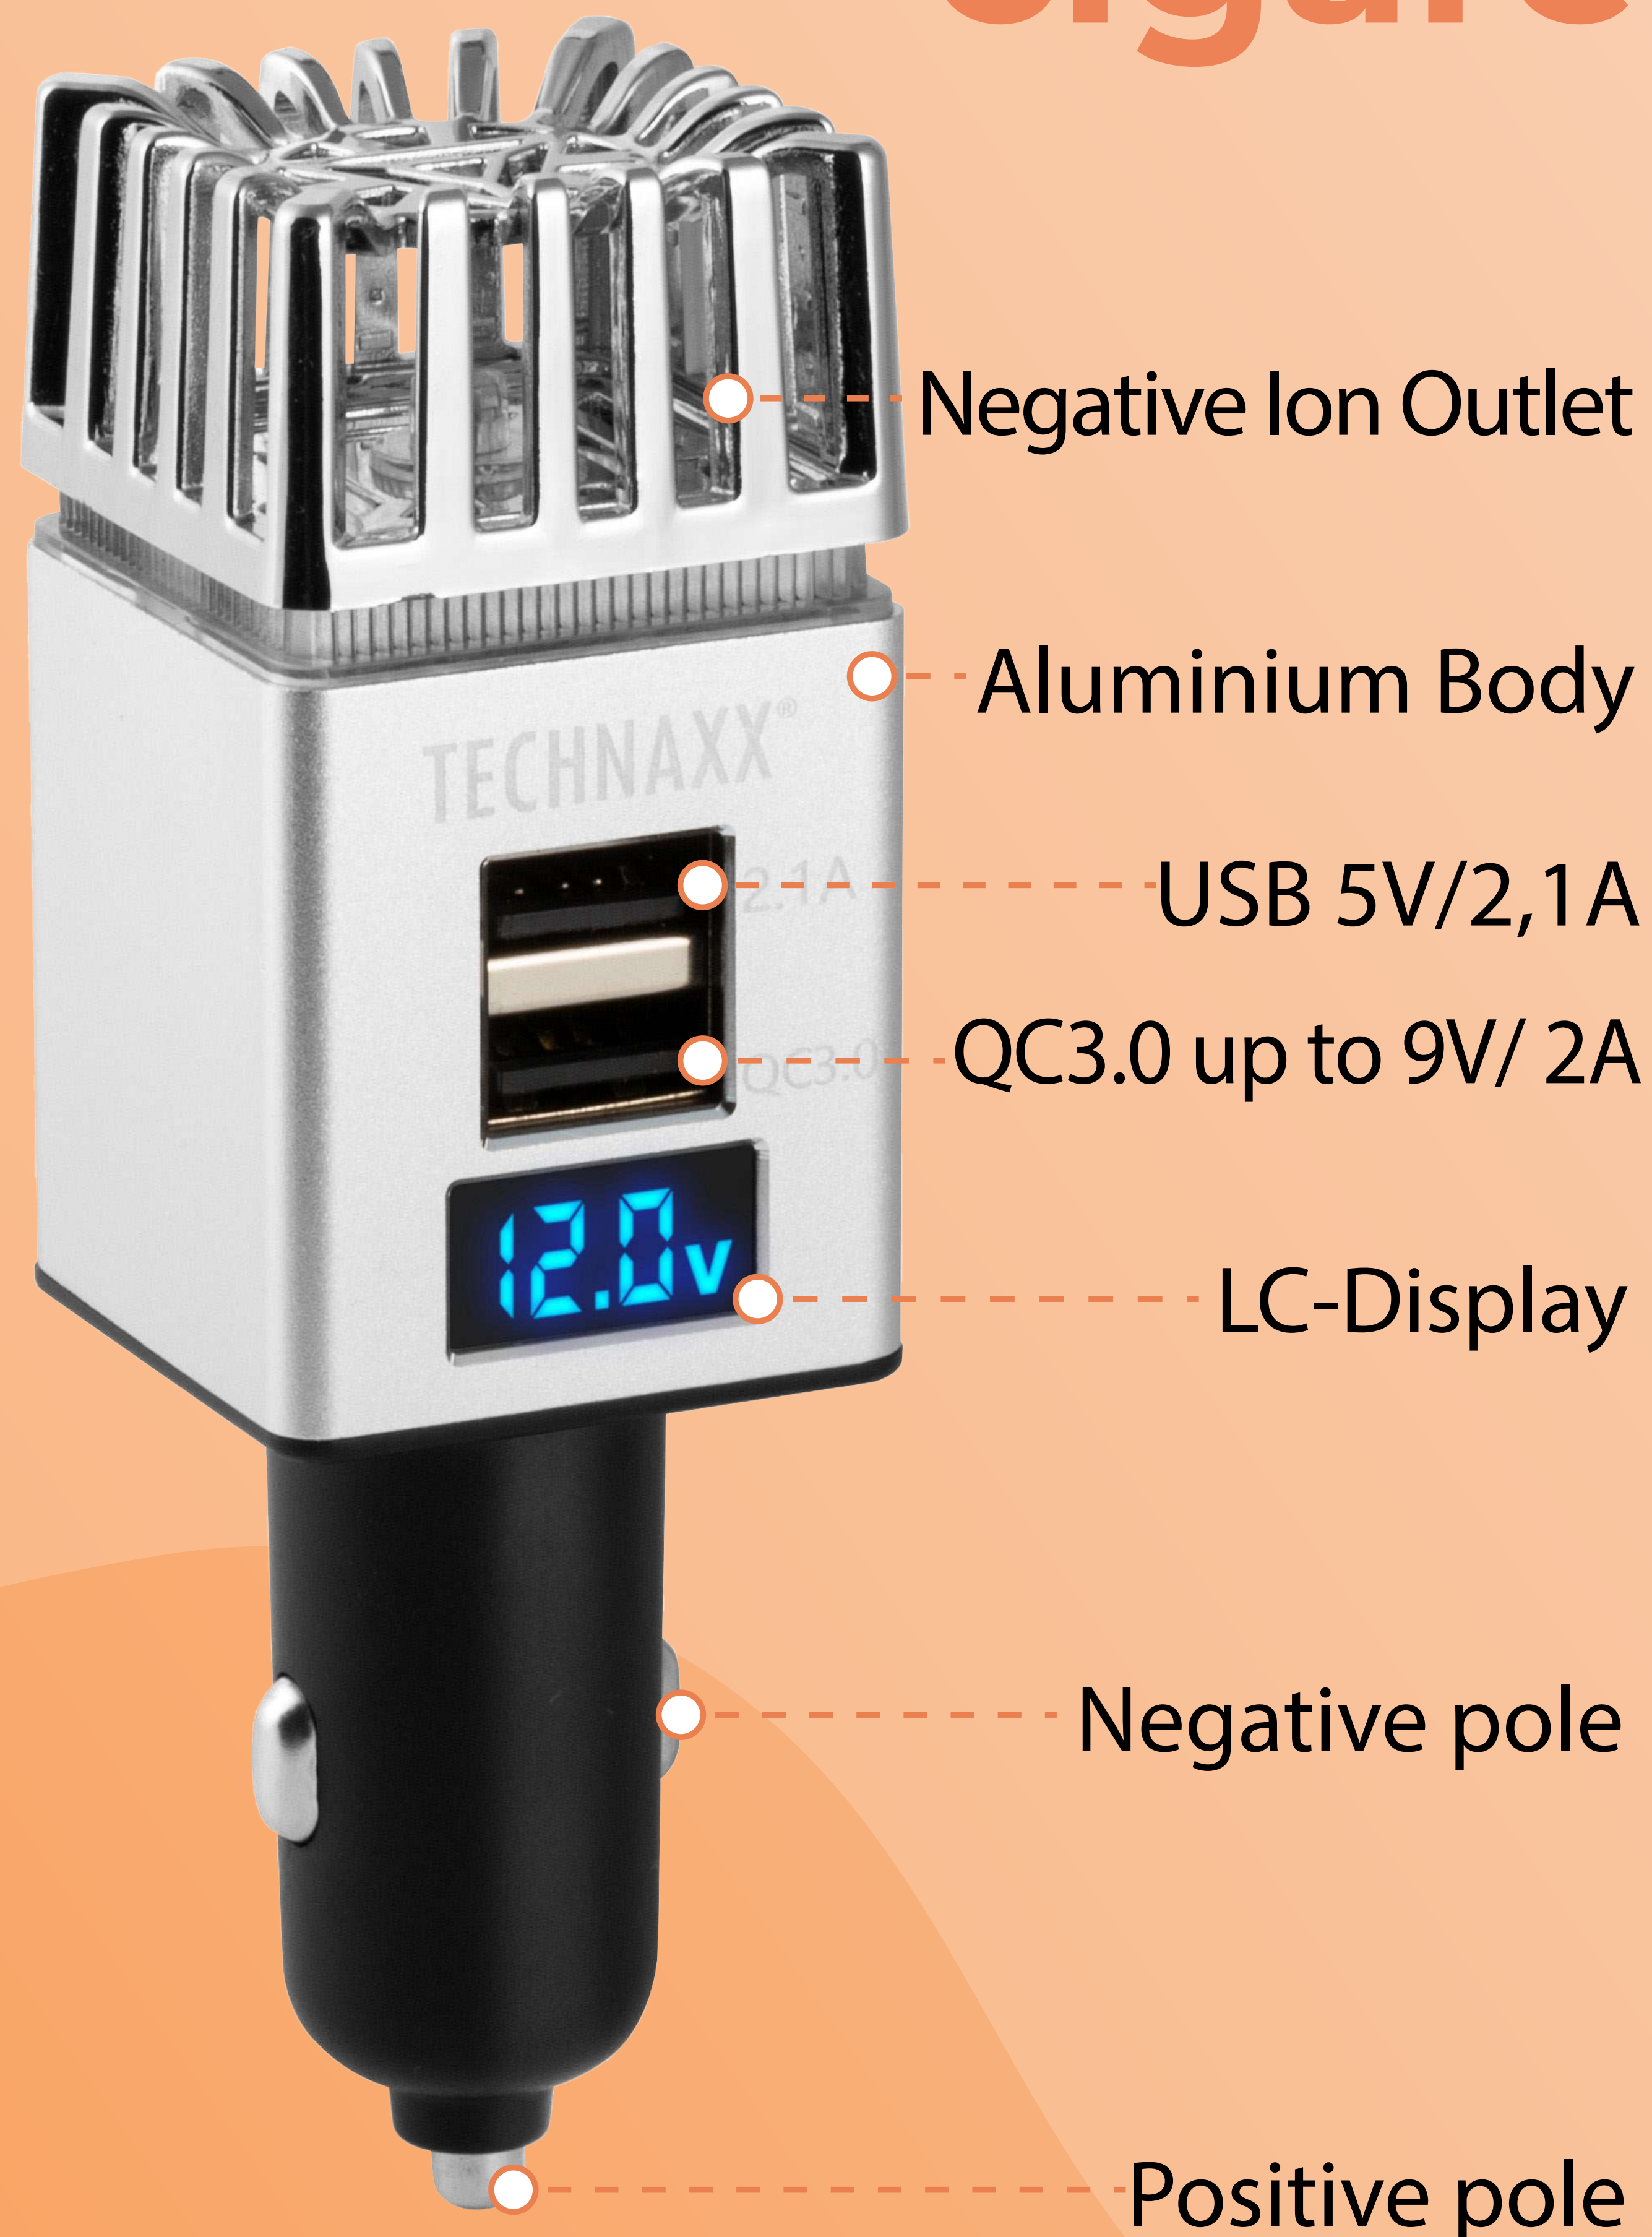

Voltage & Current monitoring

The LC-Display shows you the car battery voltage and charging current. While charging devices via USB the voltage of the car battery can change, especially when the engine is not running. With this information you are always aware of your current battery status.

TECHNAXX®
GERMANY

Car Air purifier for 12/ 24V cigarette lighter 2x USB TX-130

- 2 x USB: 1x Quick charge max.18W, 2A; 1x USB max 10.5W, 2.1A
- Display shows battery voltage, or loading voltage, or current
- Reduces cigarette smoke, smog, fumes, odors from inside the car
- Ensure an ion balance inside your car's environment
- Input voltage DC 12V/24V
- Negative ion concentration 5.6 Million per cm³
