

Radiator Fan - Extension TX-303

for radiators 100-200cm

-  Fast and easy installation
-  Reduces energy costs
-  Fits most radiators and convectors
-  ≤1W Low power consumption
-  ~35m³/h High airflow
-  <20dB Low noise level
-  Connect up to 3 devices (1x TX-302, 2x TX-303)

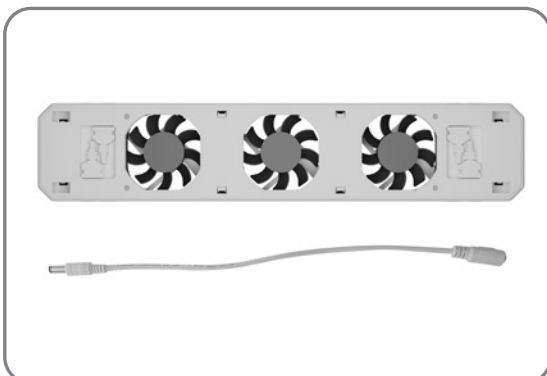

- Extension for larger radiators 100-200cm
- Allows you to lower the temperature of your heating system and save energy and money
- Heats up your rooms very quickly
- Very low power consumption
- Easy to install and fits most steel hot water radiators and convectors
- Super quiet while optimizing the air flow

Technical specifications:

- Power consumption: ≤ 1W
- External charger: In: AC100-240V~50/60Hz; 0.4A Max; Out: DC5V/2A
- Airflow: 24-25cfm / 34-35m³/h
- Fan speed: 1800rpm
- Noise level: < 20 dB
- Working temperature: -20 - 85°C; RH Less than 80% (No condensation)
- Storage temperature: -40°C - +85°C
- Weight: 0.32kg
- Dimension (LxWxH): 34.5 x 7.0 x 2.5cm
- Material: ABS + PC
- Compatibility: Radiator Fan - Mono Set TX-302

Package Contents:

1x MainUnit, 1x Extension cable (30cm), 1x User Manual

Article No.: 5215
