Nightvision Camcorder TX-141

Nightvision up to 300m

HD resolution

4 times magnification

Built-in display

Photo and video mode

Day and Night Vision

IR Viewer

LED 3W, 850nm provides ultimate quality of picture with high resolution. Reliable LED will last long and don't overheat as well.

Built in Display

1.5" TFT (480*240) screen with HD resolution performs the function of viewfinder and also you can play back recorded video or check recorded images. Very useful in outdoor/camping because you don't need additional device with display to check the data.

Digital 4X Zoom

Even with 4x zoom, the quality of the video and photo remains stellar. Consider any small details in discovered objects and also observe in ranges.

Compact and Lightweight

Approx. dimensions 140*48*69mm and weight of only 192g makes it really compact and portable. You can wear it in your pocket, bag, backpack, etc. and it will be always at hand in the right situation.

Nightvision Camcorder TX-141

Multipurpose - increase light transmission and reduce glare. The night vision binocular camera is perfect for surveillance , hunting, security, camping, navigation in dark, night fishing and boating, wildlife watching, search and rescue.
