Disco speaker with microphone BT-X53

Multipurpose

micro-SD card support & AUX output and music streaming via Bluetooth V4.2 makes this soundstation indispensable part of any parties, outdoor activities, friend meetings, camping, etc.

You can connect this karaoke machine to your home HI-FI system, home theater, sound bars or vehicle audio system and enjoy singing your favorite songs, stream music and just having fun & good time.

Disco Feature

turns your meeting into disco.
Stand-alone disco light with sound recognition, perfect for indoor/outdoor use, camping or beach party. It reacts to the music flow, so color will change to the beats. FM radio function allows you to enjoy any of wide range stations.

Build-In Battery

4000 mAh built-in rechargeable battery allows to to take this disco speaker with you anywhere. With play time up to 4-6 hours you should not worry that your party drops in wrong time.

Clear Sound

enhanced with 30W loudspeaker, this device delivers immersive sound and echo with a crystal clear sound. High-end audio processor and tuning system creates a stunning KTV live-sound environment and wonderful echo reverberation. You can always enjoy HD audio wherever you are.

Handy Size

pretty lightweight and compact construction makes it portable and convenient for storage and space saving. You can take it anywhere and turn on boring meet up to a disco karaoke. Also it has 2 microphone plugs for duets, and one microphone included in packaging.
